BACK TO NATURE

These 4 nature choices could be the perfect choices for you who want a "different" holiday experience, but don't want to travel far from the city.

1) Light Vast Lighthouse of Edam

On the Island of Edam, there stood a lighthouse called Light Vast as 65 meters. According to historical records, this lighthouse was built in 1879, under the commands of King Willem III. Edam Lighthouse had 16 floors and were made of cast iron that has a bit fragile and potholes here and there. From the top floor of a large light beacon is placed, the scenery was beautiful, almost the whole island could be seen surrounded by the blue sea and the boats harboring at the dockyard. We can also see the beauty of the surrounding marine of Jakarta Bay.

2) Sepa Island

The white-sand beaches, and crystal clear waters teeming with fish and other interesting marine life make Sepa Island a paradise for snorkelers and scuba divers. The Sepa Island Beach Resort offers rustic cottage accommodation and a well-stocked dive shop. Other activities include waterskiing, banana boats, canoeing, jetski and trips out to sea on traditional fishing boats.

3) Pelangi Island Resort

Pelangi Resort Island is located at the same assemblage with Puteri, Petondan, Sepa and Melinjo. It's about 108 km from Marina Bay Ancol, about one hour and a half ride using speedboat. Pelangi Resort was constructed in 1990. The bungalows were designed in traditional architectures raised along the stunning white sand beach. There are 32 cottages, classified into several types, at Pelangi island which are Tulip cottage (9 units), Jasmin cottage (12 units), Bougenville cottage (12 units), and Edelwiss cottage (1 units). The island provides accomodations for Glass Bottom Boat, Canoe, Banana Boat, snorkling, scuba diving, fishing, jogging and biking.

4) Martello Tower

Historical heritage from Dutch's colonialism era at Bidadari Island such as the remnants of Fort Martello become a distinctive appeal there. Martello Fort (round fort) was one of Dutch Citadel's and surveillance tower. There are seven chambers at the ground floor partitioned by bricks walls. One of the locked rooms served as a ammunition storage. The surveillance tower was supposedly constructed of two stories since there were holes for floor beams. There were seven chambers on the second story. The chambers at the second story were presumably sleeping chambers as well as surveillance rooms. The fortress was constructed of bricks thus it only managed to operate till 1878 and it was used solely as gunpowder storage.
