## CHINESE NEW YEAR 2022

### *Welcoming The Year of Water Tiger*

Chinese New Year 2022 will fall on Tuesday, February 1st, 2022, beginning a year of the Tiger.

The Tiger is known as the king of all beasts in China. The zodiac sign Tiger is a symbol of strength, exorcising evils, and braveness.

Though the Chinese New Year is meant to be spent with family and friends, the COVID-19 pandemic means that Lunar New Year celebrations around the world, will again look different this year. Many Chinese families face the prospect of their third Lunar New Year spent apart. So, many people have found new ways to celebrate the festival, from seeing lion dance parades online to more-nuclear family dinners.

The main Chinese New Year activities include putting up decorations, offering sacrifices to ancestors, eating reunion dinner with family on New Year's Eve, giving red envelopes and other gifts, firecrackers and fireworks, and watching lion and dragon dances.

Chinese New Year's importance is rooted deep in history, and today it remains the most important occasion for generations of families to reunite and spend time together. The celebration is also believed to be significant to ensure good fortune for the coming year.

We are hoping that 2022 will be a safe and healthy year, with lots of abundance and exciting new opportunities!

*Gong Xi Fa Cai!*

# WHAT TO DO DURING EARTHQUAKE

A note from Kartika Puspitasari

We refer to the recent earthquake that occurred near Jakarta. Here is what you need to do during an earthquake, whether you're at home, at work, at school or just out and about. Taking the proper actions, such as "Drop, Cover, and Hold On", can save lives and reduce your risk of death or injury. During earthquakes, drop to the floor, take cover under a sturdy desk or table, and hold on to it firmly. Be prepared to move with it until the shaking stopped.

## WHEN INDOORS

Stay as safe as possible during an earthquake. Be aware that some earthquakes are actually foreshocks and a larger earthquake might occur. Minimize your movements to a few steps to a nearby safe place and stay indoors until the shaking has stopped and you are sure exiting is safe.

- When you feel an earthquake, duck under a desk or sturdy table. Stay away from windows, bookcases, file cabinets, heavy mirrors, hanging plants, and other heavy objects that could fall. Watch out for falling plaster and ceiling tiles. Stay undercover until the shaking stops and hold onto your cover. If it moves, move with it.
- DROP to the ground; take COVER by getting under a sturdy table or other piece of furniture; and HOLD ON until the shaking stops. If there isn't a table or desk near you, cover your face and head with your arms and crouch in an inside corner of the building.
- Stay away from glass, windows, outside doors and walls, and anything that could fall, such as lighting fixtures or furniture.
- Use a doorway for shelter only if it is in close proximity to you and if you know it is a strongly supported, load-bearing doorway.
- *Stay inside until the shaking stops and Building Management announces on the P.A. that it is safe to go outside. Research has shown that most injuries occur when people inside buildings attempt to move to a different location inside the building or try to leave.*
- Be aware that the electricity may go out or the sprinkler systems or fire alarms may turn on. DO NOT use the elevators.
- *If you are in a HIGH-RISE BUILDING, and not near a desk or table, move against an interior wall and protect your head with your arms. Stay indoors. Glass windows can dislodge during the quake and sail for hundreds of feet.*
- If you're in a CROWDED STORE OR OTHER PUBLIC PLACE, do not rush for exits. Move away from display shelves containing objects that could fall.
- If you're in a WHEELCHAIR, stay in it. Move to cover, if possible, lock your wheels, and protect your head with your arms.
- If you're in the KITCHEN/ PANTRY, move away from the refrigerator, stove, and overhead cupboards. (Take time NOW to anchor appliances, and install security latches on cupboard doors to reduce hazards.)

## WHEN OUTDOORS - STAY THERE!

- If you're OUTDOORS, move to a clear area away from trees, signs, buildings, electrical wires and poles. Move away from buildings, streetlights, and utility wires.
- *Once in the open, stay there until the shaking stops. The greatest danger exists directly outside buildings, at exits, and alongside exterior walls. Many of the 120 fatalities from the 1933 Long Beach earthquake occurred when people ran outside of buildings only to be killed by falling debris from collapsing walls. Ground movement during an earthquake is seldom the direct cause of death or injury. Most earthquake-related casualties result from collapsing walls, flying glass, and falling objects.*
- If you're on a SIDEWALK NEAR BUILDINGS, duck into a doorway to protect yourself from falling bricks, glass, plaster, and other debris.
- If you're DRIVING, pull over to the side of the road and stop. Avoid overpasses, power lines, and other hazards. Stay inside the vehicle until the shaking is over. Stop as quickly as safety permits and stay in the vehicle. Avoid stopping near or under buildings, trees, overpasses, and utility wires. Proceed cautiously once the earthquake has stopped. Avoid roads, bridges, or ramps that might have been damaged by the earthquake.
